🐙 github.com/nadaelshamii

Technical Skills

Languages: Python, Powershell, Bash, C, C++, HTML/CSS, JavaScript, SQL, Assembly

Tools: Splunk, AWS, Terraform, Wireshark, Burp Suite, Nmap, Git/GitHub, Linux/Unix Systems, VS Code, Volatility

Key Competencies: Log Analysis & SIEM Correlation, Cloud Security & IAM, Threat Modeling (MITRE ATT&Ck)

Education

Sheridan College

Sep. 2023 – May 2027

Bachelor of Science in Cyber Security

Oakville, ON

- **Relevant Coursework:** : Network & Distributed Systems Security, Linux & Windows Administration, Information Systems Forensics, Security Threats & Risk Assessment, Cryptology, Secure Software Development, OS Design

Experience

Stealth startup

Jan 2025 – Apr 2025

Penetration Testing Intern

Remote, Canada

- Performed vulnerability assessments, penetration tests aligned with NIST CSF controls to identify security weaknesses.
- Utilized tools such as Nmap, Burp Suite, and Nessus to detect misconfigurations and report on risk exposure.
- Contributed to incident response documentation and recommendations to improve network security posture.
- Assisted in implementing Multi-Factor Authentication and hardening endpoint configurations in test environments.

SadServers

Aug 2025 – Jan 2026

Security Automation Intern

Remote, Canada

- Built an autonomous Linux troubleshooting agent that SSHs into SadServers and executes remediation steps
- Automated VM provisioning via SadServers API and captured command traces, success rates, timeout/error cases
- Used Inspect AI to evaluate LLM reliability, determinism, and reproducibility across repeated automation runs
- Improved response success and command safety through failure handling logic, retries, and dynamic prompt strategies

Match Retail

July 2022 – Present

Sales Consultant

Oakville, Canada

- Translated complex technical product features and service plans into clear, customer-friendly explanations
- Collaborated with teammates to implement effective sales approaches, resulting in a 200% increase in store performance
- Communicated effectively with customers to understand their needs and tailor appropriate solutions

Projects

WSUS Patch Deployment Lab | Windows Server 2022

Nov 2025

- Configured WSUS on Windows Server 2022 to centralize and automate patch deployment across all domain systems.
- Developed PowerShell scripts to manage synchronization and reporting for consistent and efficient update control.
- Applied NIST CSF control mapping to evaluate patch compliance and system security effectiveness.
- Reduced attack surface & improved audit readiness through reliable and compliant patch management processes.

SOC-in-a-Box | Security Onion & Sysmon Monitoring

Oct 2025

- Built a SOC-in-a-Box environment using Security Onion, Sysmon, and pfSense for centralized network analysis.
- Configured log forwarding, correlation rules, and dashboards to detect suspicious activity across Windows & network.
- Applied incident response frameworks to investigate alerts and validate control effectiveness through simulated attacks.
- Strengthened visibility and response readiness by improving detection accuracy & improving threat identification.

Competitions / Certificates

CTF Competitions

October 2025

Participant

Toronto, ON

- * **BSides Toronto:** Competed in capture-the-flag challenges involving network traffic analysis, web exploitation, and digital forensics while collaborating on red and blue team strategies utilizing tools like Linux, Volatility, and Wireshark.
- * **Ontario Cybersecurity Summit:** Used Splunk for log analysis and wrote scripts to extract hidden flags.

CompTIA Security+ (SY0-701)

Completed: August 2025
